

Elephants:

KNF01 - Sarita

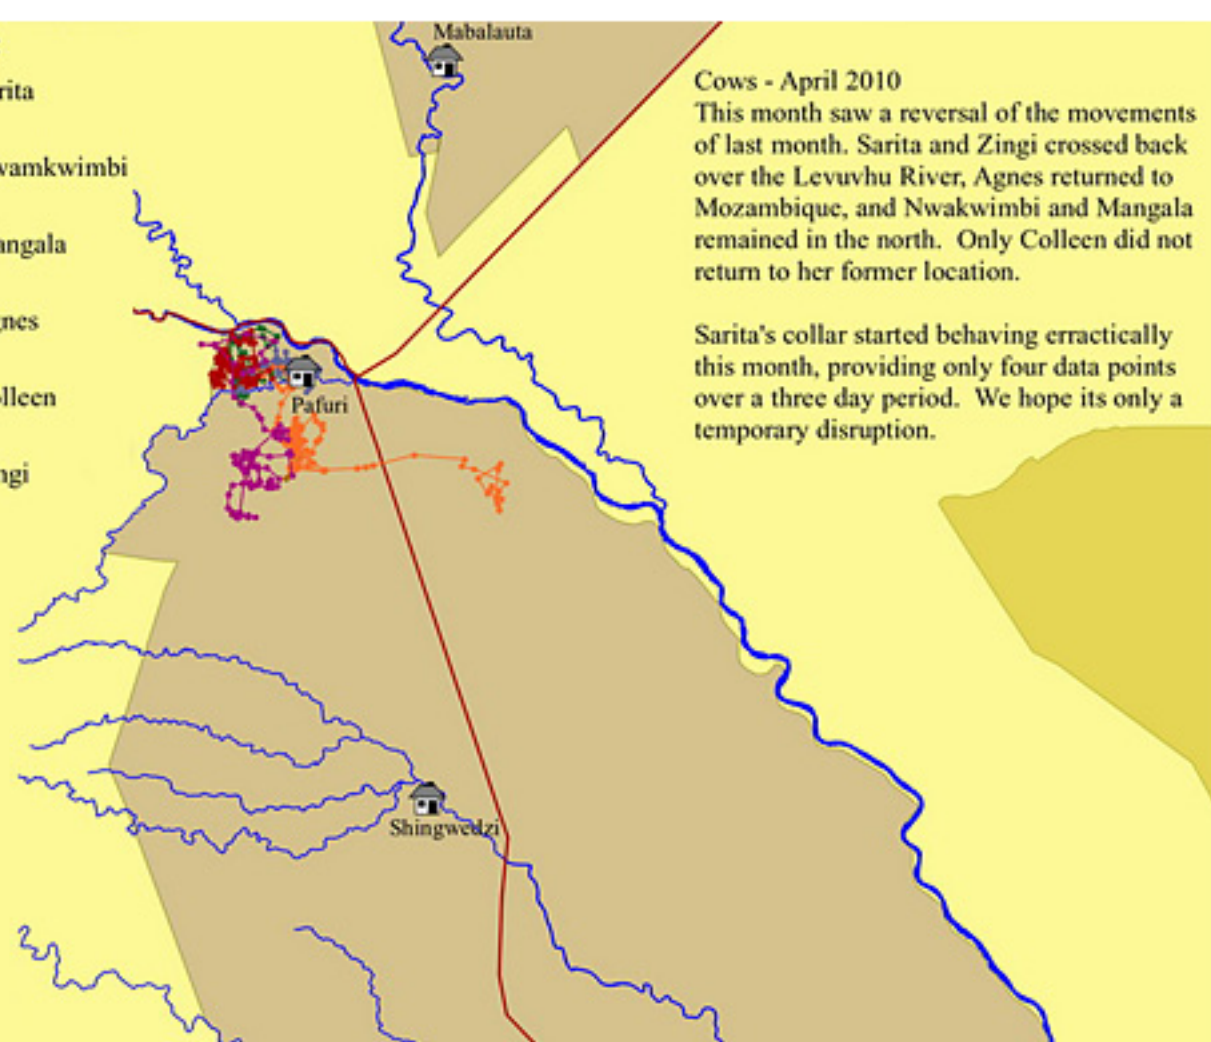

KNF02 - Nwamkwimbi

KNF03 - Mangala

KNF04 - Agnes

KNF05 - Colleen

KNF06 - Zingi

Cows - April 2010

This month saw a reversal of the movements of last month. Sarita and Zingi crossed back over the Levuvhu River, Agnes returned to Mozambique, and Nwamkwimbi and Mangala remained in the north. Only Colleen did not return to her former location.

Sarita's collar started behaving erratically this month, providing only four data points over a three day period. We hope its only a temporary disruption.

Elephants:

KNM01 - Mapimbi

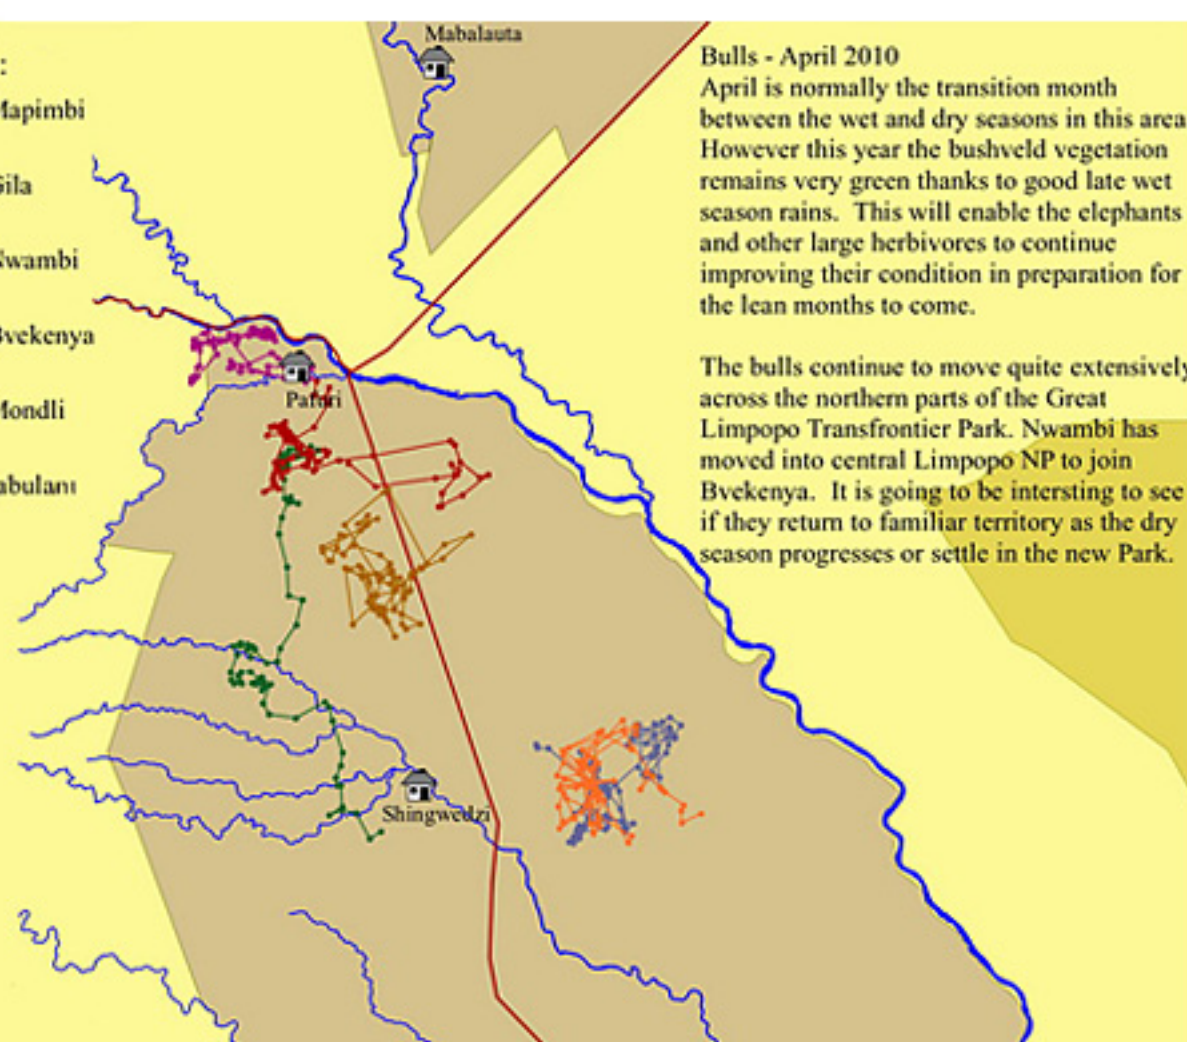

KNM02 - Gila

KNM03 - Nwambi

KNM04 - Bvekenya

KNM05 - Mondli

KNM06 - Jabulani

Bulls - April 2010

April is normally the transition month between the wet and dry seasons in this area. However this year the bushveld vegetation remains very green thanks to good late wet season rains. This will enable the elephants and other large herbivores to continue improving their condition in preparation for the lean months to come.

The bulls continue to move quite extensively across the northern parts of the Great Limpopo Transfrontier Park. Nwambi has moved into central Limpopo NP to join Bvekenya. It is going to be interesting to see if they return to familiar territory as the dry season progresses or settle in the new Park.
